AQUARIUS UTILITIES, LLC

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 1 - Adoption of Rules of Regulatory Authorities**

The rules regulating water service prescribed by the Washington Utilities and Transportation Commission, after this called the Commission, are adopted and by this reference are made a part of this tariff.

**Rule 2 - Schedules and Conditions**

The schedules and conditions specified in this tariff for water service are subject to change according to the public service laws of the State of Washington. The amount of water furnished is subject to the Department of Health required standards of quantity and quality. All schedules for water service apply to applicants for or customers receiving water service from the utility.

**Rule 3 - Application and Agreement for Service**

Each prospective customer desiring water service will be required to sign the utility's standard form of application before service is supplied.

An application for service is notice that the prospective customer desires water service from the utility and represents agreement to comply with the utility's rules and regulations on file with the Commission and in effect at the time service is furnished. In the absence of a signed application for water service, the delivery of water by the utility through a standard connection and the taking thereof by the customer will constitute an agreement by and between the utility and the customer for the delivery and acceptance of service under the applicable rate schedule(s) and these rules and regulations.

AQUARIUS UTILITIES, LLC

For Commission **ORIGINAL**

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 4 - Definition of Service**

Service will be supplied as described in these rules and under the applicable rate schedule(s). Service will be supplied only to those who secure their source of water exclusively from the utility, unless otherwise provided under written contract. Water service will be used only for the purpose specified in the service agreement and applicable rate schedule(s). A customer will not sell or permit others to use such service, unless authorized to do so under written contract with the utility.

The customer will not increase demand or use of service as stated in the application for service without giving prior notice of such increase. In the event of such increase, the customer is required to pay the utility's regularly published rates for the increased service from the date of connection and use of the service.

Whenever the customer wants to permanently discontinue the use of water through any fixtures mentioned in the original application, the customer must cause the fixture to be removed and the branch pipe or service supplying the same to be capped or plugged, and must notify the utility in writing before any reduction in charge will be made.

**Rule 5 - Reconnection Charge / Disconnection Visit Charge**

A reconnection charge, as specified in **Schedule X**, will apply for reconnection of the customer's service to the utility's distribution system. Such charge is to apply only in cases where service has been discontinued for non-payment of delinquent account, request of the customer (seasonal reconnection), and refusal to make proper repairs or similar cause. No charge will be made for reconnection of service if the shut-off was made for the convenience of the utility in making repairs, changes, etc.

The option of discontinuing service at customer request is available only to existing customers with permanent dwelling units, and is not available to new service connections until the dwelling served is legally occupied. Discontinuance of service at customer request is limited to 12 months duration, after which the customer will be billed monthly for metered service in accordance with our current tariff.

When a utility employee is dispatched to disconnect service, that person shall be required to accept payment of a delinquent account at the service address if tendered, but shall not be required to dispense change in excess of the amount due. Any excess payment shall be credited to the customer's account. The charge for a disconnection visit is specified in **Schedule X**.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 6 - Installation of Service Pipes and Meters**

The utility will construct service connections of a proper size from its distribution mains to the customer's property. The utility reserves the right to refuse to construct a service connection to any property if the applicant's pipes are not properly constructed and protected.

Meter Installation (Utility) - The utility may meter any flat rate service at its discretion. The utility's metered service rates will become effective, after the customer has received 30 days' written notice. All meters so placed will be installed and maintained by the utility without direct retrofit cost to the customer.

Meter Installation (Customer Request) - A meter will be installed upon any flat rate service at the request of the customer, provided that the actual cost of the meter and installation is paid by the customer. The amount paid will be reimbursed to the customer, by bill credit, at least ten (10) percent of the meter and installation charge each month until fully paid. All meters will be installed and maintained by the utility without future cost to the customer. The charge and conditions for this service are specified in **Schedule 10**.

**Rule 7 - Distribution Main Extension**

Utility Allowance - Where elevation and construction conditions allow and one or more bona fide prospective permanent customers request a main extension, the utility will construct and pay for the same, if the utility has sufficient capacity available to meet Department of Health standards of quantity and quality.

Customer ProRata Share - The cost of main extension in excess of the estimated customer(s) revenue for three years (utility allowance) must be paid by the prospective customers in advance.

Construction Contract - No main extension will be considered as coming under this rule where the total cost of the main extension is greater than the estimated customer(s) revenue for six years. Water main extensions and/or fire hydrants will be installed after contracts have been approved by the Washington Utilities and Transportation Commission pursuant to WAC's for special contracts for water utilities and distribution extensions.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 8 - Responsibility for, and Maintenance of, Services**

The point at which water will be delivered to and received by the customer will be on the property line (Point of Delivery) of the customer's property at a point designated by the utility. The utility will install its meter or other connection device at the Point of Delivery, except, at its option, the utility may install its meter at some other agreed point on the property of the customer, provided that in such event the property line will nevertheless be deemed the Point of Delivery.

The customer will assume all responsibility after Point of Delivery for water supplied by the utility. The utility will be exempt from all liability for loss or damage caused by leakage or escape of water furnished by the utility, after water has passed the Point of Delivery.

All service pipes and fixtures on the customer's side of the Point of Delivery shall be provided and must be maintained and protected from freezing at the customer's expense. Where there are leaking or defective pipes or fixtures, the water may be turned off at the option of the utility until properly repaired. The utility may require any service to be equipped with freeze prevention devices to be used during cold weather conditions instead of permitting water to run continuously from faucets.

**Rule 9 - Access to Premises**

The utility's regularly authorized agents or employees will have access to the premises of the customer at reasonable hours for meter reading, inspection, connection, disconnection, repair or removal of the utility's property.

The customer will pay a **Service Visit Charge** when:

- a. a utility employee or agent is dispatched to the premise and the condition was (N) caused by or was the responsibility of the customer.
- b. The utility employee or agent has not had access to read the meter for at least two billings cycle and the utility employee or agent is dispatched to access the meter and continues to not have access to the meter.

The Service Visit Charge is specified in **Schedule X**. When additional labor and equipment are required, above the .25 man-hour on site included in the Service Visit Charge, the additional will be billed to the customer on a time and material basis.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 10 - Interruption to Service**

The utility will make a diligent effort to render uninterrupted service and supply of water. In cases where shut-off is necessary for repair, reconstruction, damage prevention or similar cause, the utility will give one day's advance notice to its customers of such scheduled shut-off. However, the utility will not be responsible for any damage that may result from any cessation of services such as above outlined, nor for failure to give notice of shut-off when circumstances are such that it is impossible to give notice as stated above.

**Rule 11 - Bills / Late Payment Charge**

All bills shall be paid monthly in arrears and are due and payable upon receipt and are considered delinquent no less than twenty-five (25) days after the date mailed. Bills will be deemed received upon personal delivery to customer or three (3) days following the deposit of the bill in the United States mail to the customer's last known address. Where the meter has not been read, a minimum bill will be rendered and adjusted when the next succeeding meter reading is available.

Bills are due and payable upon receipt. Bills are considered late 25 days after the bill mailing date. A Late Payment Charge as specified in **Schedule X** of the unpaid balance shall be added to each account for each month the bill is unpaid. The late payment charge will not be applied to any disputed amount unless such amount remains unpaid for more than 25 days after the dispute has been resolved.

**Rule 12 - Deposits**

The utility may require a deposit in situations where a customer's service has been disconnected for nonpayment of amounts owed to the utility or when a customer is unable to establish or maintain credit with the utility.

The deposit will not be more than an average two-twelfths of estimated annual billing.

AQUARIUS UTILITIES, LLC

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 12 - Deposits** (cont'd)

Interest on deposits will be accrued at the rate calculated as a simple average of the effective interest rate for new issues of one year treasury bill, computed from December 1 of each year, continuing through November 30 of the following year. Interest is computed from the time of deposit to the time of refund and is compounded annually.

Deposits, plus any accrued interest, less any amount owed for service rendered, will be refunded to the customer: 1) where the customer has for 12 consecutive months paid for service when due or 2) upon termination of service.

In addition, the utility will comply with all provisions of the Commission's deposit rules, specifically, the WAC on Deposits.

**Rule 13 - Responsibility for Delinquent Accounts**

The utility will not refuse or discontinue service to an applicant or customer, who is not in arrears to the utility even though there are unpaid charges due from the premises occupied by the applicant or a customer, due to the unpaid bill of a prior tenant unless there is evidence of intent to defraud.

The utility may not permanently deny service to an applicant because of a prior obligation to the utility.

**WATER SERVICE  
RULES AND REGULATIONS**

**Rule 14 - Discontinuance of Service**

The utility reserves the right to discontinue service to its customers for:

- (a) Unpaid bills, as provided for in this tariff.
- (b) Water use for purposes or properties other than those specified in the customer's application for service.
- (c) Willful waste of water through improper or defective piping, equipment, or otherwise.
- (d) Piping or equipment that does not meet the company's standards or fails to comply with other applicable codes and regulations.
- (e) Tampering with the company's property.
- (f) Vacating the premises.
- (g) Nonpayment of any proper charges, including deposit, as provided in this tariff.
- (h) Refusing to allow access as required in commission Rules.
- (i) Violating rules, service agreements, or effective tariffs, including violation of outdoor watering instructions given to customers in order to curtail water use during time of shortage.
- (j) Use of equipment that detrimentally affects the company's service to its other customers.
- (k) Service obtained by fraud.

The right to discontinue service may be exercised whenever and as often as any of the foregoing situations occur, and neither delay nor omission by the utility to enforce this rule any time will be deemed a waiver of its right to discontinue service.

Discontinuance of service by a customer - Customer shall be required to give notice to the utility of their intention to discontinue service.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 14-Discontinuance of Service** (cont'd)

Required notice prior to disconnecting service: The Company must serve a written disconnection notice on the customer, either by mail, or, at the company's option, by personal delivery of the notice to the customer's address, attached to the primary door.

A minimum of eight (8) business days' written notice will be given a customer before service is discontinued, except in the case or danger to life or property. Before disconnecting service, the utility must in addition to the first (1<sup>st</sup>) notice as described above, provide a second (2<sup>nd</sup>) notice by one of the two options listed below.

- (1) Delivered notice – The Company must deliver a second (2<sup>nd</sup>) notice to the customer and attach it to the customer's primary door. The notice must contain a deadline for compliance that is no less than twenty-four (24) hours after the delivery that allows the customer until 5:00 p.m. of the following day to comply, or
- (2) Mailed notice- The Company must mail a second (2<sup>nd</sup>) notice, which must include a deadline for compliance that is no less than three (3) business days after the date of mailing if mailed from within the State of Washington.

Disconnection notice will expire after (10) business days from the first day that the Company may disconnect service, unless other mutually agreed upon arrangements have been made and confirmed in writing by the company. If mutually accepted arrangements are not kept, the company may disconnect service without further notice.

When a utility employee is dispatched to disconnect service, that person must accept payment of delinquent account and disconnect visit charge if specified in Schedule X. If amount owing is tendered in cash, utility employee will not be required to dispense change for excess of the amount due and owing. Any excess payment will be credited to the customer's account. The utility will restore service when the cause of discontinuance has been removed and payment of all proper charges due from customer have been made.

The utility will permanently discontinue service and physically remove the service connection when (N)

- (1) requested by the customer, or (2) when no payment has been made on the account for 18 consecutive months in accordance with the utility's policy regarding removal of service for long term non-paying customers. If specified in Schedule X, a Service Connection Removal Fee will apply. Once the service connection is so removed, it shall be regarded as never having existed. Thus, re-establishment of service to subject property will require purchase of a new service connection, with payment of all applicable tariffed fees, including Service Connection Fee (Schedule 10) and Facilities Charge (Schedule 5). **WATER SERVICE  
RULES AND REGULATIONS**

**Rule 15 - Sprinkling and Irrigation**

Water used for sprinkling and irrigation must be paid for at the regular prescribed tariff rates for such service. The hours for such use will be as prescribed from time to time by the utility, **subject** to protest by any customer effected and reviewed by the Commission. During peak use months (June through September), and at such other times when demand may be high, the utility may prohibit or limit sprinkling and irrigation to preserve water for domestic consumption.

No person will use water for sprinkling or irrigation purposes during any fire in the area, and all sprinkling or irrigation must be stopped immediately when a fire alarm is sounded. Use of water may be resumed three (3) hours after the fire has been extinguished.

**Rule 16 - Rates**

Rates for water service and supply are those published in the utility's tariff on file with the Commission. Unless otherwise stated in this tariff, the rates apply to a single service, to one customer at one premise. Where two or more families with separate housekeeping establishments occupy the same or separate dwellings, each family using water is considered a separate customer. Each separate housekeeping establishment or business, using water service, will each be considered a customer.

When conditions require that more than one customer be supplied through one meter, (Accessory Dwelling Units) each customer will be charged the minimum charge as provided by the schedule of rates. If the consumption as shown by the meter exceeds the allowance for the minimum charge multiplied by the number of customers, the excess consumption charge will be computed at the regular rates for one customer and the amount prorated equally to the multiple customers, or otherwise as may be agreed among themselves.

Water service must be subscribed to on an annual basis. No proration or reduction in billing is allowed **unless** this tariff proscribes temporary or seasonal rates.

**WATER SERVICE**  
**RULES AND REGULATIONS**

**Rule 17 – Account Set-Up Charge/NSF (Non-Sufficient Funds) Charge**

An account set-up charge as specified in **Schedule X** will be made for each new account or change of account responsibility on and existing service. Such charge will be included in the initial billing to the customer. This charge includes the utility dispatching and employee to establish a base meter reading. This account set-up charge does not apply to:

- (a) Installation of a new meter.
- (b) Temporary or seasonal reconnection.
- (c) Owners or agents assuming temporary responsibility for service to vacant premises.

An NSF check charge as specified in **Schedule X** will be made for handling customer checks that have been returned by the bank as NSF or account closed. This charge will be applied to the next billing to the customer.

**Rule 18 – Water Availability Letter Charge**

Any prospective customer seeking a water availability letter or certificate of water availability from the utility must first pay the appropriate charge as specified in **Schedule X**. The water availability letters will be valid for no more than one (1) year, or until the expiration of the associated building permit, whichever occurs last. Certificates of Water Availability, issued only upon payment of service connection and facilities charges to purchase the direct connection, do not expire.

**Rule 19 – Credit Card Processing Fee/ Credit Card Chargeback Fee**

The utility now accepts bill payment via VISA or MasterCard by telephone, and customers may use either credit or debit cards. When a customer makes payment using this service, a credit card processing fee will be charged per transaction as specified in **Schedule X** to partially offset the utility's associated administrative costs. In the event that a customer initiates a credit or debit card transaction which is disallowed by the credit card company, a credit card chargeback fee will be charged to the customer's account as specified in **Schedule X**.

**SCHEDULE NO. 5**  
**WATER SYSTEM FACILITIES CHARGE**  
**RESIDENTIAL EQUIVALENT CUSTOMER**

**Applicable:**

To all applicants for water service for properties not currently served, both within and outside the Commission Service Area for the utility, when water system capacity is available as defined by the number of connections authorized by the Washington State Department of Health, and where adequate quantity and quality are available.

**Rate**

Facilities Charge		\$2950.00	(I)
	Total Charge	\$2950.00	(I)

**Conditions**

1. Any owner, owner's agent, developer, purchaser or purchaser's agent who is a "water service applicant" shall first pay the charge set forth on this Schedule, prior to provision of water service by the utility. A "water service applicant" is a person or entity who has requested water service but has not yet become a "customer".
2. For the purpose of this tariff, a customer is defined as either one of the following:
  - a. A person or entity whose property is directly connected to the water system; or
  - b. A person or entity who has completed and signed a Water Service Application, paid all applicable fees, and had his Water Service Application accepted in writing by the utility, thereby meeting all requirements for direct connection to the water system.
3. ~~The Facilities Charge does not apply to persons or entities who are customers on or before the effective date of this tariff.~~ (D)
4. The utility will own and maintain all materials involved in the provision of water.
5. The Facilities Charge will be in addition to any main extension, service connection or other charges as may be provided elsewhere in this tariff or specified in any contract between the applicant and the utility.

AQUARIUS UTILITIES, LLC

For Commission's Receipt Stamp

6. The Facilities Charge will be made one time only as applied to the applicant's property, after which time the applicant will be directly connected to the water system. If further subdivision of the property is made at a later date, each new direct connection will be subject to an additional Facilities Charge, upon application for water service.
7. The Facilities Charge applies to one direct connection on one parcel of real property. Each additional connection or dwelling unit, e.g., duplex or detached "mother-in-law" dwelling, on said parcel will be subject to an additional Facilities Charge.

WN U-1

**AQUARIUS UTILITIES, LLC**

**For Commission's Receipt Stamp**

**SCHEDULE 6 (continued)**

**DWSRF LOAN REPAYMENT SURCHARGE**

**D. Conditions:**

Each customer must choose whether to pay the assessment as a one-time total charge or a charge over time. Each customer must exercise his or her choice within thirty days of the effective date of this Schedule as set out by commission order. There will be no prepayment penalty to any customer who initially chooses monthly payments if the customer pays the balance due during the period the surcharge is in effect.

The first bill including a surcharge for those customers that choose payments over time will be the October 2008 bill.

This schedule and the surcharge for loan repayment will expire upon the Company collecting \$2,056,214.56 in principal sums (excluding interest and taxes) or December 31, 2028, whichever occurs first.

**For Commission's Receipt Stamp**

**SCHEDULE NO. 10**  
**SERVICE CONNECTION CHARGE**

**Available**

Within the limits of all Water Service Areas and at utility's option and capability to maintain Department of Health standards of quantity and quality. (N)

**Applicable**

Applies to all new applicants for properties not currently served and not within the Commission Service Area (as defined in the tariff) for the utility only when surplus system capacity is available and a direct connection can be made to an existing main that has adequate hydraulic capacity. (N)

**Conditions**

1. A charge will be made the first time a customer's service pipe, 3/4 inch or smaller, is connected to the utility's main. The charge for a larger connection will be the cost of labor and materials. The decision to install a larger connection may result from (1) customer request, or (2) determination by the utility based on water system hydraulic considerations and/or site conditions at the subject property. This charge does not include the cost of a meter, or its installation. A meter will be furnished, installed and maintained by the utility without direct cost to the customer. (C)
2. The utility owns and maintains all materials involved in making a service connection. (O)
3. When it is necessary to cross an existing road (by boring or cutting) the cost of the crossing will be in addition to the Service Connection Charge. (C)
4. Washington State sales tax, for the county in which the property is located, will be applied to the Service Connection Charge and any additional installation costs, for payment by the applicant. (N)
5. County road permit fees, if applicable, will be in addition to the Service Connection Charge. (N)
6. Meter will be placed in a suitable meter box located at the customer's property line, except when this is not practicable. The meter may be installed upon the customer's premises in some convenient location approved by the utility where the meter will at all times be accessible for reading, inspection and testing. (See Rule 8 & 9) (N)
7. Service Connections will be installed within 21 days from payment, unless prior arrangements in writing are agreed upon by both the customer and the utility. (N)

**Charge for Service Connection, 3/4 inch or smaller** **\$950.00** (I)
