

PROPOSED STARTING POINT
RCW 19.122 revision discussion

1. Change the makeup of the safety committee by dropping the insurance seat and adding a water sewer rep. Total number still = 13.
2. Change Complaint Review panels as proposed. E.g. an equal number of excavators and facility numbers and no mandate to have a pipeline and insurance rep on each panel.
3. Give the UTC authority to bring enforcement, without a complaint, against any party that damages any buried line while digging and did not notify cbyd first.
4. Add this to the definition of marking: Locate marks do not require depth.
5. When damage occurs, notify 911 if deemed to be life-threatening, and 811, and make a reasonable attempt to notify the owner of the buried facility.
