Dear Ms. Gilbertson:

**RE: 2017 Natural Gas Standard LNG Inspection – Puget Sound Energy – Gig Harbor
LNG Satellite Plant (Insp. No. 7246)**

Staff from the Washington Utilities and Transportation Commission (staff) conducted a Natural Gas Standard LNG inspection from Jul. 24 to Aug. 3, of Puget Sound Energy, (PSE) Gig Harbor LNG Satellite Plant. The inspection included a records review and inspection of the plant facilities.

No apparent violations were noted as a result of the inspection. This inspection will be closed as of Sept. 7.

Please note that two items to be completed (observing the unloading of LNG and observing plant operations) will be scheduled for later in the year during plant operational periods.

Staff thanks PSE's personnel for their professionalism and cooperation during this inspection.

If you have any questions or if we may be of any assistance, please contact Lex Vinsel at (360) 664-1319.

Sincerely,

Sean C. Mayo
Pipeline Safety Director
