Protocol Set ID	LNG.2022.01	Supervisor	Scott Rukke	Inspection Submitted	--
		Director	Sean Mayo	Inspection Approval	--

Inspection Summary

Inspection Scope and Summary

2022 PSE Gig Harbor LNG satellite plant inspection. Last inspection was completed in 2020.

The major components of the facility include two 70,000-gallon LNG Storage Tanks, LNG Truck Unloading Station, one 650 MSCFH LNG vaporizer, Send-out Skid with boil-off compressor and odorant injection system, emergency generator, fire protection system, security system, spill impoundment system, and a Multipurpose Building which houses the Control Room, Motor Control Center, and Compressed Air Skid. There is also a storage shelter which houses PSE's portable vaporizer. Provisions have been incorporated in the facility design to allow for operation of the portable vaporizer at the Gig Harbor site.

Facilities visited and Total AFOD

Total AFODs: 3 days

2 days for records review and 1 day for field inspection

Records review completed remotely via Microsoft Teams and Email

Field Inspection completed at the LNG Plant in Gig Harbor, WA
