

Utilities and Transportation Commission
Standard Inspection Report for Intrastate Gas Transmission Pipelines
Form D - Records Review and Field Inspection

S – Satisfactory U – Unsatisfactory N/A – Not Applicable N/C – Not Checked
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

A completed **Standard Inspection Checklist, Cover Letter and Field Report** is to be submitted to the Chief Engineer within 30 days from completion of the inspection.

Inspection Report			
Inspection ID/Docket number	5854		
Inspector Name & Submit Date	Ronda Shupert		
Chief Eng Name & Review Date	Joe Subsits, 7/28/2014		
Operator Information			
Name of Operator:	Georgia Pacific - Camas, WA	OP ID #:	31096
Name of Unit(s):	Headquarters		
Records Location:	401 NE Adams Street, Camas WA		
Date(s) of Last (unit) Inspection:	PA Inspection August 2012, Standard inspection July 2011	Inspection Date(s):	July 22 nd to July 23 rd , 2014

<p>Inspection Summary:</p> <p>This was a standard inspection of Georgia Pacific's gas transmission system. It involved records review, and field verification. The operator was prepared for the inspection with the required leak surveys, pressure monitoring, OQ records, valve maintenance, marker surveys, odorant testing, public awareness, and other required tasks were performed as indicated in the O&M manual within the required timeframes. The OQ portion of the inspection with the operators performing the covered tasks with knowledge and confidence went well. He was aware of what abnormal operating conditions could arise and how to mitigate these potential safety hazards.</p>

<p>HQ Address: 401 NE Adams Street Camas, WA 98607</p>	<p>System/Unit Name & Address: Same</p>	
<p>Co. Official: Gary Kaiser Phone No.: 360-834-8106 Fax No.: Emergency Phone No.: 360-834-3021</p>	<p>Phone No.: Fax No.: Emergency Phone No.:</p>	
Persons Interviewed	Title	Phone No.
Robert L. Cosentino	President & CEO, Cosentino Consulting Inc.	360.200.4959
Carson Blocker	Reliability Engineer	360-834-8419
Ron Simmons		

**Utilities and Transportation Commission
Standard Inspection Report for Intrastate Gas Transmission Pipelines
Form D - Records Review and Field Inspection**

S – Satisfactory U – Unsatisfactory N/A – Not Applicable N/C – Not Checked
If an item is marked U, N/A, or N/C, an explanation must be included in this report.

UTC staff conducted abbreviated procedures inspection on 192 O&M and WAC items that changed since the last inspection. This checklist focuses on Records and Field items per a routine standard inspection.			
(check one below and enter appropriate date)			
X	Team inspection was performed (Within the past five years.) or,	Date:	July 2011
X	Other UTC Inspector reviewed the O & M Manual (Since the last yearly review of the manual by the operator.) An onsite manual review was performed in 2012 by Dennis Ritter	Date:	

GAS SYSTEM OPERATIONS			
Gas Supplier	Williams		
Number of reportable safety related conditions last year	0	Number of deferred leaks in system	0
Number of <u>non-reportable</u> safety related conditions last year	0	Number of third party hits last year	0
Miles of transmission pipeline within unit (total miles and miles in class 3 & 4 areas)	1 total all within class 3		
Operating Pressure(s):		MAOP (Within last year)	Actual Operating Pressure (At time of Inspection)
Feeder:	--		
Town:	--		
Other:	Transmission, 250 psig or less	800	
Does the operator have any transmission pipelines?	Yes, but all are outside the state of Washington		
Compressor stations? Use Attachment 4.	None		

Pipe Specifications:			
Year Installed (Range)	1993	Pipe Diameters (Range)	12
Material Type	API 5L, X-42 ERW Steel 0.307" & 0.365" API 5L, X-52 ERW Steel 0.279	Line Pipe Specification Used	API 5L, X-42 ERW
Mileage	1	SMYS %	SMYS @ MAOP = 33% SMYS @ MOP = 10%
Supply Company		Class Locations	3

Integrity Management Field Validation	
Important: Per PHMSA, IMP Field Verification Form 16 (Rev 6/18/2012) shall be used by the inspector as part of this standard inspection. When completed, the inspector will upload this information into the PHMSA IM Database (IMDB) located at http://primis.phmsa.dot.gov/gasimp/home.gim Date Uploaded:	

PART 199 DRUG and ALCOHOL TESTING REGULATIONS and PROCEDURES		S	U	NA	NC
Subparts A - C	Drug & Alcohol Testing & Misuse Prevention Program – Use PHMSA Form #13, Rev 3/19/2010. Do not ask the company to have a drug and alcohol expert available for this portion of your inspection.	X			

PART 192 Implement Applicable Control Room Management Procedures		S	U	NA	NC
.605(b)(12)	Implementing the applicable control room management procedures required by 192.631. (Amdt. 192- 112, 74 FR 63310, December 3, 2009, eff. 2/1/2010). This facility does not utilize a pipeline control room			X

S – Satisfactory U – Unsatisfactory N/A – Not Applicable N/C – Not Checked
If an item is marked U, N/A, or N/C, an explanation must be included in this report.

REPORTING RECORDS			S	U	N/A	N/C
	ADB-08-07	Updates to NMPS: Operators are required to make update submissions every 12 months if any system modifications have occurred. Go to http://www.npms.phmsa.dot.gov/submission/ to review existing data on record. Also report <u>no modifications if none have occurred since the last complete submission.</u> Include operator contact information with <u>all</u> updates. Satisfactory				
2.	RCW 81.88.080	Pipeline Mapping System: Has the operator provided accurate maps (or updates) of pipelines, operating over two hundred fifty pounds per square inch gauge, to specifications developed by the commission sufficient to meet the needs of first responders? Yes, also see appendix B of the O&M	X			
3.	191.5	Immediate Notice of certain incidents to NRC (800) 424-8802 , or electronically at http://www.nrc.uscg.mil/nrchp.html , and additional report if significant new information becomes available. None have occurred. See section 9 of O&M for procedures.	X			
4.	191.7	Reports (except SRCR and offshore pipeline condition reports) submitted electronically to PHMSA at http://portal.phmsa.dot.gov/pipeline unless an alternative reporting method is authorized IAW with paragraph (d) of this section. None have occurred. See section 9 of O&M for procedures.	X			
5.	191.15(a)	Do records indicate reportable <u>incidents</u> were identified and reports were submitted to DOT on Form 7100.2 (01-2002) within the required timeframe? None have occurred. See section 9 of O&M for procedures.	X			
6.	191.15(c)	Do records indicate accurate supplemental incident reports were filed and within the required timeframe? None have occurred. See section 9 of O&M for procedures.	X			
7.	191.17	Complete and submit DOT Form PHMSA F 7100-2.1 by March 15 of each calendar year for the preceding year. (NOTE: June 15, 2013 for the year 2012.) Available for inspection.				
8.	191.22	Each operator must obtain an OPID, validate its OPIDs, and notify PHMSA of certain events at http://portal.phmsa.dot.gov/pipeline OPID's have been verified, see PHMSA Portal.	X			
9.	191.23	Have complete and accurate <u>Annual Reports</u> been submitted? Available for inspection.	X			
10.	191.25 49 U.S.C. 60139, Subsection (b)(2)	Filing the SRCR within 5 days of determination, but not later than 10 days after discovery. Note: Operators of gas transmission pipelines that if the pipeline pressure exceeds maximum allowable operating pressure (MAOP) plus the build-up, owner/operator must report the exceedance to PHMSA on or before the fifth day following the date on which the exceedance occurs. The report should be titled "Gas Transmission MAOP Exceedance" and provide the following information: <ul style="list-style-type: none"> • The name and principal address of the operator, date of the report, name, job title, and business telephone number of the person submitting the report. • The name, job title, and business telephone number of the person who determined the condition exists. • The date the condition was discovered and the date the condition was first determined to exist. • The location of the condition, with reference to the town/city/county and state or offshore site, and as appropriate, nearest street address, offshore platform, survey station number, milepost, landmark, and the name of the commodity transported or stored. The corrective action taken before the report was submitted and the planned follow-up or future corrective action, including the anticipated schedule for starting and concluding such action. None have occurred. See section 9 of O&M for procedures.	X			
11.	191.27(a), (b)	Do records indicate reports were submitted within 60 days of completing inspections of underwater pipelines? N/A, no pipelines in the gulf of Mexico.			X	
12.	192.727(g)	Do records indicate reports were filed for abandoned offshore pipeline facilities or abandoned onshore pipeline facilities that crosses over, under or through a commercially navigable waterway? N/A, no abandoned facilities or commercially navigable waterway.			X	
13.	480-93-200(1)	Telephonic Reports to UTC Pipeline Safety Incident Notification 1-888-321-9144 (Within 2 hours) for events which (regardless of cause); None have occurred. See section 9 of O&M for procedures.	X			
14.	480-93-200(1)(a)	Result in a fatality or personal injury requiring hospitalization; None have occurred. See section 9 of O&M for procedures.	X

REPORTING RECORDS			S	U	N/A	N/C
15.	480-93-200(1)(b)	Results in damage to property of the operator and others of a combined total exceeding fifty thousand dollars; None have occurred. See section 9 of O&M for procedures. Note: Report all damages regardless if claim was filed with pipeline company or not.	X			
16.	480-93-200(1)(c)	Results in the evacuation of a building, or high occupancy structures or areas; None have occurred. See section 9 of O&M for procedures.	X			
17.	480-93-200(1)(d)	Results in the unintentional ignition of gas; None have occurred. See section 9 of O&M for procedures.	X			
18.	480-93-200(1)(e)	Results in the unscheduled interruption of service furnished by any operator to twenty five or more distribution customers; None have occurred. See section 9 of O&M for procedures.	X			
19.	480-93-200(1)(f)	Results in a pipeline or system pressure exceeding the MAOP plus ten percent or the maximum pressure allowed by proximity considerations outlined in WAC 480-93-020; One event occurring on April 27, 2012. Notice sent to WUTC via certified mail. Records available for inspection.	X			
20.	480-93-200(1)(g)	Is significant, in the judgment of the operator, even though it does not meet the criteria of (a) through (e) of this subsection; or None have occurred. See section 9 of O&M for procedures.	X			
21.	480-93-200(2)	Telephonic Reports to UTC Pipeline Safety Incident Notification 1-888-321-9146 (Within 24 hours) for; None have occurred. See section 9 of O&M for procedures.	X			
22.	480-93-200(2)(a)	The uncontrolled release of gas for more than two hours; None have occurred. See section 9 of O&M for procedures.	X			
23.	480-93-200(2)(b)	The taking of a high pressure supply or transmission pipeline or a major distribution supply pipeline out of service; O&M Manual 9.2.2.1 (B)	X			
24.	480-93-200(2)(c)	A pipeline operating at low pressure dropping below the safe operating conditions of attached appliances and gas equipment; or	X			
25.	480-93-200(2)(d)	A pipeline pressure exceeding the MAOP See section 9 of O&M for procedures. One on April 27, 2012.	X			

Comments:

26.	480-93-200(5)	Written incident reports (within 30 days) including the following; None have occurred. See section 9 of O&M for procedures.	S	U	N/A	N/C
27.	480-93-200(4)(a)	Name(s) and address(es) of any person or persons injured or killed, or whose property was damaged; None have occurred. See section 9 of O&M for procedures.	X			
28.	480-93-200(4)(b)	The extent of injuries and damage; None have occurred. See section 9 of O&M for procedures.	X			
29.	480-93-200(4)(c)	A description of the incident or hazardous condition including the date, time, and place, and reason why the incident occurred. If more than one reportable condition arises from a single incident, each must be included in the report; None have occurred. See section 9 of O&M for procedures.	X			
30.	480-93-200(4)(d)	A description of the gas pipeline involved in the incident or hazardous condition, the system operating pressure at that time, and the MAOP of the facilities involved; None have occurred. See section 9 of O&M for procedures.	X			
31.	480-93-200(4)(e)	The date and time the gas pipeline company was first notified of the incident; None have occurred. See section 9 of O&M for procedures.	X			
32.	480-93-200(4)(f)	The date and time the ((operators')) gas pipeline company's first responders arrived on-site; None have occurred. See section 9 of O&M for procedures.	X			
33.	480-93-200(4)(g)	The date and time the gas ((facility)) pipeline was made safe; None have occurred. See section 9 of O&M for procedures.	X

		Public Awareness Program .616	S	U	N/A	N/C
192.603(b)	Operators in existence on June 20, 2005, must have completed their written programs no later than June 20, 2006. See 192.616(a) and (j) for exceptions. Yes, program since 2006		Satisfactory			
	API RP 1162 Baseline* Recommended Message Deliveries Yes, available for review, also see the PA audit which occurred in 2012 by Patti					
	Stakeholder Audience (Natural Gas Transmission Line Operators)	Baseline Message Frequency (starting from effective date of Plan)				
	Residents Along Right-of-Way and Places of Congregation	2 years				
	Emergency Officials	Annual				
	Public Officials	3 years				
	Excavator and Contractors	Annual				
	One-Call Centers	As required of One-Call Center				
* Refer to API RP 1162 for additional requirements, including general program recommendations, supplemental requirements, recordkeeping, program evaluation, etc.						
116.	192.603(b)	The operator's program must specifically include provisions to educate the public, appropriate government organizations, and persons engaged in excavation related activities on: .616(d) (1) Use of a one-call notification system prior to excavation and other damage prevention activities; (2) Possible hazards associated with the unintended release from a gas pipeline facility (3) Physical indications of a possible release; (4) Steps to be taken for public safety on the event of a gas pipeline release; and (5) Procedures to report such an event (to the operator).	X			
117.		Documentation properly and adequately reflects implementation of operator's Public Awareness Program requirements - Stakeholder Audience identification, message type and content, delivery method and frequency, supplemental enhancements, program evaluations, etc. (i.e. contact or mailing rosters, postage receipts, return receipts, audience contact documentation, etc. for emergency responder, public officials, school superintendents, program evaluations, etc.). .616 (e) & (f) Paradigm does an annual effectiveness, GP reviews and CCI reviews.	X			
118.						
119.		The program conducted in English and any other languages commonly understood by a significant number of the population in the operator's area. .616(g)	X			
120.		Do records indicate implementation of a program evaluation process implemented and continuous improvements based on the findings? 192.616(i) (192.616(h); API RP 1162, Section 2.7 Step 11; API RP 1162, Section 8) Paradigm does an annual effectiveness, GP reviews and CCI reviews.	X			
121.		Analyzing accidents and failures including laboratory analysis where appropriate to determine cause and prevention of recurrence .617 Note: Including excavation damage (PHMSA area of emphasis) Yes, none have occurred. O&M section 8.8.	X

COMPRESSOR STATIONS INSPECTION N/A, no compressors installed		S	U	N/A	N/C
(Note: Facilities may be “Grandfathered”) If not located on a platform check here and skip 192.167(c)					
.707	Markers			X	
.199/.731	Are pressure relief/limiting devices inside a compressor station designed, installed, and inspected properly? (192.199, 192.731(a), (b), (c))			X	
.735(a), (b)	Are combustible materials in quantities exceeding normal daily usage, stored a safe distance from the compressor building?			X	
	Are aboveground oil or gasoline storage tanks protected in accordance with NFPA standard No. 30 ?			X	
.736(a), (b)	Have adequate gas detection and alarm systems been installed in selected applicable compressor buildings?			X	

Comments:

Alternative Maximum Allowable Operating Pressure
N/A GP does not use alternative MAOP

For additional guidance refer to <http://primis.phmsa.dot.gov/maop/faqs.htm>
 For Additional guidance see the FAQs at <http://primis.phmsa.dot.gov/maop/faqs.htm>

192.620	Alternative MAOP Procedures and Verifications	S	U	N/A	N/C								
	The alternative MAOP is calculated by using different factors in the same formulas used for calculating MAOP in §192.619. In determining the alternative design pressure under §192.105 use a design factor determined in accordance with §192.111(b), (c), or (d), or, if none of these apply in accordance with:												
	<table style="margin-left: auto; margin-right: auto;"> <tr> <td style="padding-right: 20px;">Class Location</td> <td>Alternative Design Factor (F)</td> </tr> <tr> <td style="padding-right: 20px;">1</td> <td>0.80</td> </tr> <tr> <td style="padding-right: 20px;">2</td> <td>0.67</td> </tr> <tr> <td style="padding-right: 20px;">3</td> <td>0.56</td> </tr> </table>	Class Location	Alternative Design Factor (F)	1	0.80	2	0.67	3	0.56				
Class Location	Alternative Design Factor (F)												
1	0.80												
2	0.67												
3	0.56												
.620(a)	(1) Establish alternative MAOP commensurate with class location – no class 4			X									
	(2) MAOP cannot exceed the lowest of the following:												
	(i) Design pressure of the weakest element			X									
	(ii) Test pressure divided by applicable factor			X									
.620(b)	(2) Pipeline constructed of steel pipe meeting additional requirements in §192.112.			X

	Alternative MAOP Procedures and Verifications	S	U	N/A	N/C
192.620	(3) SCADA system with remote monitoring and control			X	
	(4) Additional construction requirements described in §192.328			X	
	(5) No mechanical couplings			X	
	(6) No failures indicative of systemic material fault – if previously operated at lower MAOP			X	
	(7) 95% of girth welds have NDT			X	
.620(c)	(1) PHMSA notified 180 days before operating at alternative MAOP			X	
	(2) Senior Executive signatures and copy to PHMSA			X	
	(4) Strength test per §192.505 or certify previous strength test			X	
	(6) Construction tasks treated as covered tasks for Operator Qualification			X	
	(7) Records maintained for life of system			X	
	(8) Class location change anomaly remediations			X	
620(d)	(1) Threat matrix developed consistent with §192.917			X	
	(2) Recalculate the potential impact circle per §192.903 and implement public education per §192.616			X	
	(3) Responding to an emergency in an HCA				
	(i) Identify HCAs using larger impact circle			X	
	(ii) Check personnel response times			X	
	(iii) Verify remote valve abilities			X	
	(iv) Verify line break valve control system			X	
	(4) Protect the right-of-way:				
	(i) ROW patrols 12 per year not to exceed 45 days			X	
	(ii) Plan to identify and mitigate unstable soil			X	
(iii) Replace loss of cover if needed			X

		S	U	N/A	N/C
192.620	Alternative MAOP Procedures and Verifications				
	(iv) Use line-of-sight markers per §192.707			X	
	(v) Review damage prevention program in light of national consensus practices			X	
	(vi) ROW management plan to protect against excavation activities			X	
	(5) Control Internal Corrosion:				
	(i) Program to monitor gas constituents			X	
	(ii) Filter separators if needed			X	
	(iii) Gas Monitoring equipment used			X	
	(iv) Cleaning pigs, inhibitors, and sample accumulated liquids				
	.620(d)	(v) Limit CO ₂ , H ₂ S, and water in the gas stream			X
(vi) Quarterly program review based on monitoring results				X	
(6) (i) Control interference that can impact external corrosion				X	
(ii) Survey to address interference currents and remedial actions				X	
(7) Confirm external corrosion control through indirect assessment				X	
(i) Assess adequacy of CIS and perform DCVG or ACVG within 6 months					
(ii) Remediate damage with IR drop > 35%				X	
(iii) Integrate internal inspection results with indirect assessment				X	
(iv) Periodic assessments for HCAs				X	
(A-C) Close interval surveys, test stations at ½ mile intervals, and integrate results					
(8) Cathodic Protection				X	
(i) Complete remediations within 6 months of failed reading					
(ii) Confirm restoration by a close interval survey				X	
(iii) Cathodic protection system operational within 12 months of construction completion				X	
(9) Baseline assessment of integrity				X	
(i)(A) Geometry tool run within 6 months of service

192.620	Alternative MAOP Procedures and Verifications	S	U	N/A	N/C
	(i)(B) High resolution MFL tool run within 3 years of service			X	
	(ii) Geometry and MFL tool 2 years prior to raising pressure for existing lines			X	
	(iii) If short portions cannot accommodate tools, use direct assessment per §192.925, 927, 929 or pressure testing			X	
	(10) Periodic integrity assessments			X	
	(i) Frequency for assessments determined as if all segments covered by Subpart O				
	(ii) Inspect using MFL tool or direct assessment per §192.925, 927, 929 or pressure testing.			X	
	(11) Repairs			X	
	(i)(A) Use of the most conservative calculation for anomaly remaining strength				
	(B) Tool tolerances taken into consideration			X	
	(ii) Immediate repairs for:			X	
	(A) Dents meeting 309(b) criteria				
	(B) Defects meeting immediate criteria in §192.933(d)			X	
	(C) Calculated failure pressure ratio less than 1.25 for .67 design factor			X	
	(D) Calculated failure pressure ratio less than 1.4 for .56 design factor			X	
	(iii) Repairs within 1 year for:			X	
	(A) Defects meeting 1 year criteria in 933(d)				
	(B) Calculated failure pressure ratio less than 1.25 for .80 design factor			X	
	(C) Calculated failure pressure ratio less than 1.50 for .67 design factor			X	
	(D) Calculated failure pressure ratio less than 1.80 for .56 design factor			X	
	(iv) Evaluate defect growth rate for anomalies with > 1 year repair interval and set repair interval			X	
	(1) Provide overpressure protection to a max of 104% MAOP			X	
.620(e)	Does the AMAOP process include overpressure protection requirements?			X	
	Do records indicate that overpressure protection requirements were met?			X
