PART 199 DRUG and ALCOHOL TESTING REGULATIONS and PROCEDURES		S	U	NA	NC
Subparts A - C	Drug & Alcohol Testing & Misuse Prevention Program – Use PHMSA Form #13, Rev 3/19/2010. Do not ask the company to have a drug and alcohol expert available for this portion of your inspection. <b>MIS submitted 4/12/13</b>	X			

<b>Comments:</b>	
------------------	--

RECORDS REVIEW			S	U	NA	NC
CONVERSION TO SERVICE						
1.	195.5(a)(2)	All aboveground segments of the pipeline, and appropriately selected underground segments must be visually inspected for physical defects and operating conditions which reasonably could be expected to impair the strength or tightness of the pipeline. <b>No conversions to service</b>			X	
2.	195.5(c)	Pipeline Records (Life of System) <b>No conversions to service</b>			X	
3.		Pipeline Investigations <b>No conversions to service</b>			X	
4.		Pipeline Testing <b>No conversions to service</b>			X	
5.		Pipeline Repairs <b>No conversions to service</b>			X	
6.		Pipeline Replacements <b>No conversions to service</b>			X	
7.		Pipeline Alterations <b>No conversions to service</b>			X	
REGULATED RURAL GATHERING LINES			S	U	NA	NC
8.	195.11(a)	Operator has identified pipelines that are Regulated Rural Gathering Lines that meet all of the following criteria: (Amt. 195-89, Pub. 06/03/08 eff. 07/03/08). <b>No gathering lines</b> (1) nominal diameter from 6 5/8 inches to 8 5/8 inches; (2) located in or within one-quarter mile of a USA (3) operates at an MOP established under §195.406 that is: (i) greater than 20% SMYS; or (ii) if the stress level is unknown, or not steel; > 125 psig.			X	
9.	195.11(b)	Operator has prepared written procedures to carry out the requirements of <b>195.11</b> . (Amt. 195-89, Pub. 06/03/08 eff. 07/03/08). <b>No gathering lines</b> <ul style="list-style-type: none"> <li>Subpart B Reporting</li> <li>Corrosion Control</li> <li>Damage Prevention</li> <li>Public Awareness</li> <li>Establish MAOP</li> <li>Line Markers</li> <li>Operator Qualification</li> </ul>			X	
10.	195.11(c)	If a new USA is identified after July 3, 2008, the operator must implement the requirements in paragraphs (b)(2 - 8), and (b)(11) for affected pipelines within 6 months of identification. For steel pipelines, comply with the deadlines in paragraphs (b)(9 & 10). <b>No gathering lines</b>			X

## Standard Inspection Report for Intrastate Hazardous Liquid Systems

### Records Review and Field Inspection

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

31.	480-75-630(2)	Written reports to the commission within 30 calendar days of the incident. The report must include the following: <b>No incidents</b> a) Name(s) and address(es) of any person or persons injured or killed or whose property was damaged; (b) The extent of injuries and damage; (c) A description of the incident including date, time, and place; (d) A description and maximum operating pressure of the pipeline implicated in the incident and the system operating pressure at the time of the incident; (e) The date and time the pipeline returns to safe operations; and (f) The date, time, and type of any temporary or permanent repair.				X	
32.	480-75-630(3)	Telephonic notification within twenty-four hours of emergency situations including emergency shutdowns, material defects, or physical damage that impairs the serviceability of the pipeline. <b>No emergencies</b>				X	
33.	480-75-630(4)	<b>Filing Reports of Damage to Hazardous Liquid Pipeline Facilities to the commission. (eff 4/1/2013)</b> (Via the commission's Virtual DIRT system or on-line damage reporting form)					
34.	480-75-630(4)(a)	Does the operator report to the commission the requirements set forth in RCW 19.122.053(3) (a) through (n)	X				
35.	480-75-630(4)(b)	Does the operator report the name, address, and phone number of the person or entity that the company has reason to believe may have caused damage due to excavations conducted <u>without facility locates first being completed?</u>	X				
36.	480-75-630(4)(c)	Does the operator retain all damage and damage claim records it creates related to damage events reported under 93-200(7)(b), including photographs and documentation supporting the conclusion that a facilities locate was not completed? <b>Note: Records maintained for two years and made available to the commission upon request.</b>	X				
37.	480-75-630(5)	Does the operator provide the following information to excavators who damage hazardous liquid pipeline facilities?					
38.	480-75-630(5)(a)	<ul style="list-style-type: none"> <li>Notification requirements for excavators under RCW 19.122.050(1)</li> </ul>	X				
39.	480-75-630(5)(b)	<ul style="list-style-type: none"> <li>A description of the excavator's responsibilities for reporting damages under RCW 19.122.053; and</li> </ul>	X				
40.	480-75-630(5)(c)	<ul style="list-style-type: none"> <li>Information concerning the safety committee referenced under RCW 19.122.130, including committee contact information, and the process for filing a complaint with the safety committee.</li> </ul>	X				
41.	480-75-630(6)	<b>Reports to the commission only when the operator or its contractor observes or becomes aware of the following activities...</b> <ul style="list-style-type: none"> <li>An excavator digs within thirty-five feet of a transmission pipeline, as defined by RCW 19.122.020(26) without first obtaining a facilities locate; (630(6)(a)</li> <li>A person intentionally damages or removes marks indicating the location or presence of hazardous liquid pipeline facilities. 630(6)(b)</li> </ul>				X

**Standard Inspection Report for Intrastate Hazardous Liquid Systems**  
**Records Review and Field Inspection**

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

44.	195.222(a)	Welders must be qualified in accordance with Section 6 of API Standard 1104 (20 <sup>th</sup> edition 2005, including errata/addendum 7/2007 and errata 2 12/2008) or Section IX of the ASME Boiler and Pressure Vessel Code (2007 edition, July 1, 2007), except that a welder qualified under an earlier edition than currently listed in 195.3 may weld, but may not requalify under that earlier edition. (Amdt 195-94 Pub. 8/11/10 eff. 10/01/10). <b>No welding</b>				X	
45.	195.222(b)	Welders may not weld with a particular welding process unless, within the preceding 6 calendar months, the welder has (1) Engaged in welding with that process; and (2) Had one weld tested and found acceptable under Section 9 of API 1104. <b>No welding</b>				X	
46.	195.226(a)	Arc burns must be repaired. <b>No welding</b>				X	
47.	195.226(b)	If a notch is not repairable by grinding, a cylinder of the pipe containing the entire notch must be removed. <b>No welding</b> Do arc burn repair procedures require verification of the removal of the metallurgical notch by nondestructive testing? (Ammonium Persulfate). <b>Sect 527 O&amp;M</b>	X				
48.	195.226(c)	The ground wire may not be welded to the pipe/fitting being welded. <b>Sect 527 O&amp;M</b>	X				
49.	195.228/.234	Do procedures require welds to be nondestructively tested to ensure their acceptability according to API 1104 and as per 195.228(b) and per the requirements of 195.234 in regard to the number of welds to be tested? <b>521.1.1 Nondestructive Testing of Weld</b>	X				
50.	195.234(b)	Nondestructive testing of welds performed: <b>No welding</b> (1) In accordance with written procedures for NDT (2) By qualified personnel (3) By a process that will indicate any defects that may affect the integrity of the weld				X	
51.	195.234(d) 195.266(a)	Do records demonstrate at least 10% of all welds that are made by each welder during each welding day are nondestructively tested over the entire circumference of the welds or that more welds are tested per the operator's own procedures? <b>No welding</b>				X	
52.	195.234(e) 195.266(a)	Do records demonstrate all girth welds installed each day in selected locations specified in §195.234(e) are nondestructively tested over their entire circumference? <b>No welding</b>				X	
53.	195.234(f) 195.266(a)	Do records demonstrate that when installing used pipe, 100% of the old girth welds are nondestructively tested? <b>No welding</b>				X	
54.	195.234(g) 195.266(a)	Do records demonstrate 100% of the girth welds have been nondestructively tested at selected pipe tie-ins? <b>No welding</b>				X	
55.	195.266	Construction Records maintained for life of pipeline					
56.	195.266(b)	Amount, Location, Cover of each Size of Pipe Installed <b>Every 5 yrs</b>	X				
57.	195.266(c)	Location of each Crossing with another <b>Pipeline Revision date on map? AOC??</b>	X				
58.	195.266(d)	Location of each buried Utility Crossing	X				
59.	195.266(e)	Location of Overhead Crossings <b>No overhead crossings</b>				X	
60.	195.266(f)	Location of each Valve and Test Station	X				
<b>PRESSURE TESTING</b>			<b>S</b>	<b>U</b>	<b>NA</b>	<b>NC</b>	
61.	195.302(a)	Pipelines, and each pipeline segment that has been relocated, replaced, or otherwise changed, must be pressure tested without leakage (see .302(b), .303, and .305(b) for exceptions). <b>Kaneb pipeline relocation in 1995-approx 6200' --cannot find pressure test documents. MOP 1429- test pressure 1812.</b>				X

OPERATION & MAINTENANCE		S	U	NA	NC
82.		Annual Review of O&M Manual (1 per yr/15 months) May 2, 2013 last review			
83.	195.402(a)	X			
		Appropriate parts must be kept at locations where O&M activities are conducted kept at operator's desk			
84.	195.402(c)(4)	X			
		Determination of Areas requiring immediate response for Failures or Malfunctions--Systems Operations Manual for each line 18/24 for SRT Inbound/Outbound; 19/32 for BNRR			
85.	195.402(c)(5)			X	
		Pipeline accidents analyzed to determine their causes No accidents			
86.	195.402(c)(10)			X	
		Abandoning pipeline facilities, including safe disconnection from an operating pipeline system, purging of combustibles, and sealing abandoned environmental hazards. No abandoned pipelines Reporting abandoned pipeline facilities offshore, or onshore crossing commercially navigable waterways per 195.59			
87.	195.402(c)(12)	X			
		Establishment/Maintaining liaison with Fire, Police, and other Public Officials			
88.	195.402(c)(13)	X			
		Periodic review of personnel work – effectiveness of normal O&M procedures and corrective action when deficiencies are found			
89.	195.402(c)(15)			X	
		Implementing the applicable control room management procedures required by 195.446. (Amdt. 195-93, 74 FR 63310, December 3, 2009, eff. 2/1/2010). No control room			
90.	195.402(e)(1)	X			
		Records that indicate receiving, identifying, classifying and communicating notices of events requiring immediate response in accordance with procedures.			
91.	195.402(e)(2)			X	
		Prompt and effective response to each type of emergency Note: Review operator records of previous accidents and failures including third-party damage and leak response No emergencies			
92.	195.402(e)(7)			X	
		Records indicating that notifications were made to fire, police, and other appropriate public officials of hazardous liquid emergencies and were coordinated with preplanned and actual responses (including additional precautions necessary for an emergency involving HVLs)? No emergencies			
93.	195.402(e)(9)			X	
		Post accident review of employees' activities to determine if procedures were effective and corrective action was taken? No emergencies			
94.	195.402(e)(10)			X	
		Actions to be taken by a controller during an emergency in accordance with 195.446. (Amdt. 195-93, 74 FR 63310, December 3, 2009, eff. 2/1/2010). No emergencies			
95.	195.403(a)	X			
		Records of operator provided training to its emergency response personnel as required			
96.	195.403(b)(1)	X			
		Annual review with personnel on performance in meeting the objectives of the emergency response training program (1 per yr/15 months)

## Standard Inspection Report for Intrastate Hazardous Liquid Systems

### Records Review and Field Inspection

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

97.	195.403(b)(2)	Make appropriate changes to the emergency response training program (1 per yr/15 months) <b>No emergencies</b>			X	
-----	---------------	-------------------------------------------------------------------------------------------------------------------	--	--	---	--

Comments:

OPERATION & MAINTENANCE (Cont)			S	U	NA	NC
98.	195.403(c)	Verification of supervisor knowledge of emergency response procedures (1 per yr/15 months) <b>Ron McClary and Mark Davis</b>	X			
99.	195.404(a)(1)	Maps and Records of the following facilities maintained and made available: i. Breakout tanks ii. Pump stations iii. Scraper and sphere facilities iv. Pipeline valves v. Facilities to which 195.402(c)(9) applies vi. Rights-of-way vii. Safety devices to which 195.428 applies	X			
100.	195.404(a)(2)	All crossings of public roads, railroads, rivers, buried utilities and foreign pipelines.	X			
101.	195.404(a)(3)	The maximum operating pressure of each pipeline in accordance with 195.406 <b>Cannot support MOP as do not have pressure test records.</b>		X		
102.	195.404(a)(4)	The diameter, grade, type, and nominal wall thickness of all pipe.	X			
103.	195.404(b)(2) 195.402(d)(1)	Response to any emergency or abnormal operations applicable under 195.402 (maintained for at least 3yrs) as required by written procedures <b>No emergencies</b>			X	
104.	195.404(b) 195.402(d)(5)	Periodic review of personnel work – effectiveness of abnormal operation procedures/corrective action taken when deficiencies found.	X			
105.	195.404(c)(1)	The date, location, and description of each repair made on the pipe and maintain it for the <b>life of the pipe.</b>	X			
106.	195.404(c)(2)	The date, location, and description of each repair made to parts of the pipeline system other than the pipe and maintain it for at least <b>1 year. No repairs.</b>			X	
107.	195.404(c)(3)	Each inspection and test required by <b>Subpart F</b> shall be maintained for at least <b>2 years, or until the next inspection or test is performed, whichever is longer.</b>	X			
108.	195.406(a)/ .406(a)(1)	Except for surge pressures and other variations from normal operations, no operator shall operate a pipeline above the MOP, and the MOP may not exceed any of the following; • The internal design pressure of the pipe determined by <b>195.106 cannot pump to MOP as 500 psi is shut off head for BN 200 for Chevron (MOP 1429 and 285 respectively)</b>	X			
109.	480-75-620	Change in MOP? Changed based on hydrotest? <b>No change in MOP</b>			X	
110.	195.408(b)	Records indicating emergency communication system(s) use was as required <b>No emergencies</b>			X	
111.	195.412(a)	Operator must inspect the right-of-way at intervals not exceeding <b>3 weeks</b> , but at least <b>26 times each calendar year Check every week</b>	X			
112.	195.412(b)	Records indicating ROW surface conditions and crossings under navigable waterways were inspected, and reporting and appropriate mitigation performed <b>No waterway crossings</b>			X

S – Satisfactory    U – Unsatisfactory    N/A – Not Applicable    N/C – Not Checked  
 If an item is marked U, N/A, or N/C, an explanation must be included in this report.

113.	480-75-640	Depth of cover surveys and mitigation	X			
114.	195.420(b)	Mainline valves inspected to determine that it is functioning properly at intervals not exceeding <b>7½ months</b> , but at least <b>twice</b> each calendar year.	X			
115.	480-75-500	Pipe movement study per API 1117 <b>No criteria met to do a pipe movement study</b>			X	
116.	195.428(a)	Insp. of overpressure safety devices ( <b>1 per yr/15 months</b> non-HVL; <b>2 per yr/7½ months</b> HVL)	X			
117.	195.428(b)	Inspection of Relief Devices on HVL Tanks (intervals NTE <b>5 yrs</b> ). <b>No HVL tanks</b>			X	
118.	195.428(c)	Above ground breakout tanks that are constructed or significantly altered according to API Standard 2510 after October 2, 2000, must have an overflow protection system installed according to section 5.1.2 of API Standard 2510. Amt. 195-86 Pub. 06/09/06 eff. 07/10/06. Tanks over 600 gallons (2271 liters) constructed or significantly altered after October 2, 2000, must have overflow protection according to API Recommended Practice 2350 unless operator noted in procedures manual (195.402) why compliance with API RP 2350 is not necessary for the safety of a particular breakout tank.	X			
119.	195.428(d)	Inspection of Overflow Systems ( <b>1 per yr/15 months</b> non-HVL; <b>2 per yr/7½ months</b> HVL)	X			
120.	480-75-300 (3)	Leak detection and alarm records	X			
121.	480-75-320	Surge analysis done? <b>BN 2007, SRT Chevron 2000 OK</b>	X			
122.	195.430	Inspection of Fire Fighting Equipment	X			
123.	195.432(c)	<b>Breakout Tanks:</b> Inspect the physical integrity of in-service steel aboveground breakout tanks built to <b>API Standard 2510</b> according to <b>Section 6 of API 510</b> . Amt. 195-86 Pub. 06/09/06 eff 07/10/06. <b>Note: For Break-out tank unit inspection, refer to Breakout Tank Form No API 2510 tanks all 12C or 650</b>			X	

<b>PUBLIC AWARENESS PROGRAM PROCEDURES</b> (In accordance with API RP 1162)			S	U	NA	NC	
124.	195.440 (e & f)	<b>PUBLIC AWARENESS PROGRAM</b>	X				
		Documentation properly and adequately reflects implementation of operator's Public Awareness Program requirements – Stakeholder Audience identification, message type and content, delivery method and frequency, supplemental enhancements, program evaluations, etc. (i.e. contact or mailing rosters, postage receipts, return receipts, audience contact documentation, etc. for emergency responder, public officials, school superintendents, program evaluations, etc). See table below.					
		Operators in existence on June 20, 2005, must have completed their written program no later than June 20, 2006					
		<b>API RP 1162 Baseline* Recommended Message Delivery Frequencies</b>					
		<b>Stakeholder Audience (Hazardous Liquid Operators)</b>					<b>Baseline Message Frequency (Starting from Effective Date of Plan)</b>
		Residence along right-of-way and Places of Congregation					2 Years
		Emergency Officials					Annual
		Public Officials					3 Years
		Excavator and Contractors					Annual
		One-Call Centers					As required of one-call center
* Refer to API RP 1162 for additional requirements, including general program recommendations, supplemental requirements, record keeping, program evaluation, etc.							
125.	.440(g)	The program must be conducted in English and any other languages commonly understood by a significant number of the population in the operator's area. <b>No other language—the original pipeline runs only between Chevron (Tesoro now) and Tidewater 2 stakeholders along the line). Did publish ad in local Spanish newspaper in Spanish. With new pipelines, Tidewater has new program which includes new pipeline (Nustar). Provider is “The Service Center” out of Houston, Texas is now program coordinator for Tidewater.</b>	X

DAMAGE PREVENTION PROGRAM			S	U	NA	NC
127.	195.442(a)	Records indicating the damage prevention program is being carried out as written	X			
128.	195.442(c)(1)	List of Current Excavators	X			
129.	195.442(c)(2)	Notification of Public/Excavators	X			
130.	195.442(c)(3)	Notifications of planned excavations. (One -Call Records)	X			
131.	195.442(c)(4)	If the operator has buried pipelines in the area of excavation activity, provide for actual notification of persons who give notice of their intent to excavate of the type of temporary marking to be provided and how to identify the markings.	X			
132.	195.442(c)(5)	Provide for temporary marking of buried pipelines in the area of excavation activity before, as far as practical, the activity begins.	X			
133.	195.442(c)(6)	Provide as follows for inspection of pipelines that an operator has reason to believe could be damaged by excavation activities:				
134.		1. Is the inspection the done as frequently as necessary during and after the activities to verify the integrity of the pipeline? <b>No inspections</b>			X	
135.		2. In the case of blasting, does the inspection include leakage surveys? (required) <b>No blasting</b>			X	
136.		Does the operator review records of accidents and failures due to excavation damage to ensure causes of failures are addressed to minimize the possibility of reoccurrence? <b>No accidents</b>			X	
137.	<b>OPERATOR QUALIFICATION</b>					
138.	195.507(a) .507(b)	Are personnel properly <u>qualified</u> in accordance with the operator’s Operator Qualification plan and with federal and state requirements?	X			
139.	195.507(a) .507(b)	Are qualification records available for contractor personnel that contain the required elements? <b>Shelco (NuStart contractor) and Hermiston Aviation</b>	X
