Re: Decommissioning of NW Natural Mobile LNG Vaporizer

Dear Mr. Rukke:

This letter is to formally notify the Washington Utilities and Transportation Commission that NW Natural has decommissioned our Mobile LNG vaporizer from service effective March 20, 2025.

Prior to decommissioning, a study was conducted to evaluate the vaporizer for a potential upgrade, compliance with NFPA 59A, and overall operational optimization. Based on the findings of that review, it was determined that the vaporizer does not meet current standards and would require significant modification.

Should the need for mobile LNG vaporization services arise in the future, we intend to contract with a qualified third-party provider to perform those functions.

Additionally, we will retain all associated manuals and procedures related to mobile LNG operations for reference and potential future use.

Sincerely,

Ryan Truair
